

SIDE SPREAD CONTROL

SIDESPREAD CONTROL™

Patent U.S. 10,993,368

Your EarthWay spreader includes a patented feature to prevent fertilizer from being spread to the left side. To activate this feature, slide the lever below the hopper to the back (if standing behind the spreader) and position the left wheel 6"-12" from your sidewalk or border. This will not waste fertilizer like competitor designs that leave 7X the fertilizer inside the wheels from blocking material leaving the impeller.

ASSEMBLY

For assembly, flip up handle and tighten each wing nut to hold handle in position.
