

Seed Plate Guide

This is a list of all the seed plates currently produced for the 1001-B Precision Garden Seeder.

Information:

- ☑ The 1001-B Precision Garden Seeder will travel 36"/91.4cm for one revolution of the seed plate.
- ☑ Custom seed fitting can be easily accomplished by partially filling the seed cups of a larger seed plate using bees wax. Spacing changes can be made by filling the seed cup fully with bees wax to get the desired spacing.
- ☑ If you have problems with small seeds getting behind the seed plate, dip the seed plate in soapy water then let air dry. This should solve your problem.
