#### SIDE SPREAD CONTROL

Your EarthWay spreader **SIDESPREAD CONTROL™** includes a patented feature to prevent fertilizer from being called side spread control. This feature turns off fertilizer from being spread to the left side. To activate this feature, slide the lever below the hopper to the right (if standing behind the spreader) and walk along a sidewalk or flowerbed that is 12"-14" on your left side. This will not waste fertilizer like competitor designs that leave 7X the fertilizer inside the wheels from blocking material leaving the impeller.
